Choose PEFC Manufacturing approach for the rubber plantations certification and Trees outside Forests sector with ISO processes and PEFC standards, certification systems appropriate to the rubber PEFC aims to provide a mechanism for smallholders to pursue certification together, which helps reduce costs and allow them to share roles and responsibilities. PEFC is the world’s largest forest certification system and has expanded its scope into Natural Rubber, and improving access to the EU market. Natural Rubber production is a key commodity with global demand, and represents an important source of income for smallholders. Smallholder success depends on improved genetics and tapping techniques; appropriate practices to mitigate any feasible compliance processes; and balanced representation in stakeholders based on United Nation Agenda 21. Our multi-stakeholder approach helps bring the voices of supply chain actors are heard.

PEFC/01-00-01 National Bodies

PEFC offers the largest support systems among stakeholders based on unique, specific requirements for natural rubber plantations and rubberwood.

PEFC’s Forest Certification, scalable and accessible system for smallholders
