Foreword

The PEFC Council requires that forest management certification shall be carried out by certification bodies who are accredited by accreditation bodies that are signatories of the International Accreditation Forum's Multilateral Recognition Arrangement (IAF MLA) for Management Systems Certification and according to the requirements of this document. Under exceptional circumstances, the PEFC Council may also accept accreditation for Product Certification, as per Appendix 4 of this document.

Accreditation bodies that are signatories of the IAF MLA are required to operate to the highest standard. They are admitted to the IAF MLA only after a stringent evaluation of their operations by a peer evaluation team charged with ensuring that the applicant complies fully with both international standards and IAF requirements. The IAF evaluates accreditation bodies at regular intervals.

Certification bodies accredited by signatories of the IAF MLA are required to comply with appropriate IAF Documents. The IAF MLA ensures the acceptance of accredited certification worldwide.

This document's text was developed by a multi-stakeholder Working Group coordinated by the PEFC Council Secretariat and approved by the PEFC Council General Assembly on 15 May 2024.

The development was undertaken in an open, transparent, consultative, and consensus-driven process covering a broad range of stakeholders in line with the requirements specified in the PEFC Council Technical Documents Development Procedures (PEFC GD 1003).

With the publication of this document, Annex 6, Certification and Accreditation procedures of the previous PEFC technical documentation, is no longer valid.

PEFC endorsed certification systems that already include requirements for certification bodies providing SFM certification that go beyond Annex 6, Certification and Accreditation procedures, can align their requirements for certification bodies with this standard during the next review of their system. If the result of the review is that the SFM standard does not need to be revised, the system still needs to align the requirements for certification bodies providing SFM certification with this standard, and provide them to the Secretariat for assessment and endorsement.

PEFC endorsed certification systems that include requirements for certification bodies providing SFM certification that are limited to what is required in Annex 6, Certification and Accreditation procedures, have two years to adopt and adapt their requirements for certification bodies to this standard, and send proof of evidence to the Secretariat. The assessment and endorsement of the requirements by the PEFC Council will be conducted during the next review of their system.
Introduction

The PEFC Council requires that certification bodies operating forest management certification against PEFC endorsed forest management standards meet the requirements of ISO/IEC 17021-1.

PEFC forest management is considered management system certification in accordance with ISO/IEC 17021-1. In exceptional cases, PEFC may accept that endorsed national or regional forest certification systems base their accreditation requirements for certification bodies on ISO/IEC 17065. In those cases, the endorsed system shall follow this standard, and the additional requirements set out in Appendix 4 of this standard.

This document is based on ISO/IEC 17021-1. It does not include the text of this standard, which can be obtained from ISO or national standard organisations.

1. Scope

This document lays out the PEFC international benchmark requirements for certification bodies operating sustainable forest management certification.

This standard defines the minimum international requirements for certification bodies to be adopted by the PEFC endorsed national and regional forest certification systems and indicates the specific benchmark requirements that shall be further developed by the PEFC endorsed national or regional certification systems and be adapted to their local conditions, following PEFC’s bottom-up approach principle.

The following requirements within this standard are benchmark requirements: 7.1.4.4 (specification of indicators to be evaluated by the certification body during its risk assessment), 7.1.5.1 (requirements for calculating and determining the audit time) and Appendix 1, 4.3.2.2, 4.3.2.3 and 4.3.3.1 (adaption of the sampling for group forest certificates, when applicable).

PEFC endorsed national or regional forest certification systems may add additional requirements to ensure comprehensive and functional certification procedures.

Interpretations for Trees outside Forests (TOF) are outlined in Appendix 5 of this standard. All requirements within the standard referring to “forest” and “forestry” are also applicable to TOF unless otherwise indicated in Appendix 5.

All requirements within the standard referring to “forest” also cover plantations, as per Appendix 1 of PEFC ST 1003, Sustainable Forest Management – Requirements.

In this standard, the following verbal forms are used: “shall” indicates a requirement; “should” indicates a recommendation; “may” indicates a permission; “can” indicates a possibility or a capability. Further details can be found in the ISO/IEC Directives, Part 2.
2. Normative references

The following referenced documents are indispensable for the application of this standard. The latest edition of the referenced document (including any amendment) applies for both dated and undated references.

ISO/IEC 17000, Conformity assessment – Vocabulary and general principles
ISO/IEC 17021-1, Conformity assessment – Requirements for bodies providing audit and certification of management systems – Part 1: Requirements
ISO 19011, Guidelines for auditing Management systems
PEFC ST 1003, Sustainable Forest Management – Requirements (available from www.pefc.org)
PEFC ST 1002, Group Forest Management Certification – Requirements (available from www.pefc.org)

3. Terms and definitions

For the purposes of this standard, the relevant definitions given in ISO/IEC 17000, ISO/IEC 17021-1, PEFC ST 1003, Sustainable Forest Management, and PEFC ST 1002, Group Forest Management Certification, apply, together with the following definitions:

3.1 Accreditation body

An authoritative body that performs accreditation, where accreditation is the third-party attestation related to a conformity assessment body conveying formal demonstration of its competence to carry out specific conformity assessment tasks (Source: definition is based on ISO/IEC 17011).

3.2 Affected stakeholder

A stakeholder who might experience a direct change in living and/or working conditions caused by the implementation of a standard, or a stakeholder who might be a user of a standard and therefore is subject to the requirements of the standard.

Note 1: Affected stakeholders include neighbouring communities, Indigenous people, workers, etc. However, having an interest in the subject matter of the standard (e.g., NGOs, scientific community, civil society) is not equal to being affected.

Note 2: A stakeholder who might be a user of the standard is likely to become a certified entity, e.g., a forest manager in the case of a forest management standard, or a wood processing enterprise in the case of a chain of custody standard.

3.3 Audit programme

Arrangements for a set of one or more audits planned for a specific time frame and directed towards a specific purpose (Source: definition is based on ISO 19011:2018 clause 3.4).

3.4 Audit plan

Description of the activities and arrangements for a specific audit (Source: definition is based on ISO 19011:2018 clause 3.6).
3.5 Certificate

A document issued by a certification body under the provision of this standard confirming that the requirements as set out by a PEFC endorsed forest management standard, or standards and other applicable requirements, are fulfilled.

Note: Certificates are sometimes referred as “certification documents”.

3.6 Certification decision maker

A person or a group of persons (e.g., a committee) that has not been involved in the audit process and is assigned by the certification body to make the certification decision.

3.7 Certified area

The forest area covered by a sustainable forest management system according to PEFC ST 1003, Sustainable Forest Management – Requirements.

In the group certification context, the certified area represents the sum of forest areas of the group participants.

3.8 PEFC Council certification scheme

Set of rules and procedures for the management of similar or related conformity assessment systems. The PEFC certification scheme is maintained at PEFC Council level and adapted to the local conditions through the implementation of the PEFC endorsed national or regional forest certification systems.

3.9 PEFC endorsed national or regional forest certification system (PEFC endorsed certification system)

A certification system is the application of a certification scheme to a particular set of specified requirements in a specific geographical area. A PEFC endorsed national or regional forest certification system is the application of the PEFC Council certification scheme to a particular geographical area. The set of specified requirements is the adaption of the PEFC Sustainable Forest management benchmark requirements to the specific geographical area through the sustainable forest management and related standards developed by the system, in compliance with the rules of the scheme.

3.10 Certification body

A certification body is a third-party conformity assessment body operating certification against a PEFC endorsed national or regional forest certification system, which is accredited for that system according to ISO/IEC 17021 by an accreditation body member of IAF MLA.

3.11 Client organisation (client)

Organisation, including a group organisation, that is certified or is seeking certification of its forest management system.

Note: The client is the holder of a certificate and is responsible for ensuring that all requirements of the forest management standard are met with respect to the certified area covered by that certificate.

3.12 Corrupt practice

Corrupt practices include bribery of public officials; embezzlement, trading in influence, abuse of function, and illicit enrichment by public officials; and bribery and embezzlement in the private sector, as well as money-laundering and obstruction of justice, in alignment with by the United Nations Convention against Corruption.
3.13 **Documented information**
Information required to be controlled and maintained by an organisation using any format and media, from any source.

3.14 **Expired certification**
The certification is not renewed after the certificate expiry date.

3.15 **Group certification**
Certification of the group organisation under one group forest certificate.

3.16 **Group entity**
A legal entity that represents the participants, with overall responsibility for ensuring the conformity of forest management in the certified area to the PEFC endorsed forest management standard and other applicable requirements of the forest certification system. For this purpose, the group entity is using a group management system.

*Note:* The structure of the group entity should follow the operations, number of participants and other basic conditions of the group organisation. It may be represented by one person.

3.17 **Group forest certificate**
A document confirming that the group organisation complies with the requirements of the forest management standard and other applicable requirements of the forest certification system.

3.18 **Group organisation**
A group of participants represented by the group entity for the purposes of implementation of the forest management standard and its certification.

*Note 1:* The term “group organisation” is equivalent to the term “regional group” if the group is defined by regional boundaries or other terms chosen by the relevant forest certification system and complying with the content of this definition.

*Note 2:* The term “group organisation” is a specific form of a “multisite organisation”.

3.19 **Information and communication technologies**
Information and communication technologies, ICT, is the use of technology for gathering, storing, retrieving, processing, analysing, and transmitting information. It includes software and hardware such as smartphones, handheld devices, laptop computers, desktop computers, drones, video cameras, wearable technology, artificial intelligence, and others. The use of ICT may be appropriate for auditing/assessment both locally and remotely (Source: IAF MD4:2023).

3.20 **Major nonconformity**
The absence of, or failure to implement and maintain, one or more requirements of the PEFC Sustainability Benchmarks or the regional, national, or sub-national forest management standard/s endorsed by PEFC against which the audit is carried out, which may result in a systemic risk to the function and effectiveness of the forest management.

*Note:* A major nonconformity may be an individual nonconformity or a number of minor but related nonconformities that, when considered in total, are judged to constitute a major nonconformity.
3.21 Minor nonconformity
A failure to fulfil the requirements of the PEFC Sustainability Benchmarks or the regional, national, or sub-national forest management standard/s endorsed by PEFC against which the audit is carried out that does not result in systemic risk to the function and effectiveness of the forest management.

3.22 Participant
A forest owner/manager covered by the group forest certificate, who is able to implement the requirements of the forest management standard in a certified area.

Note: The term “ability to implement the requirements of the forest management standard” requires the entity to have a long-term legal right, tenure right, or traditional or customary tenure rights to manage the forest and would disqualify one-off contractors from becoming participants in group certification.

Where regional or national systems allow contractors without long-term management rights for a specific forest area to participate in group certification, the system shall ensure that these contractors can only make PEFC claims for material originating from certified areas of participants or individually certified forest owners/managers with long-term legal or tenure management rights.

3.23 PEFC authorised body
The PEFC authorised body is an entity that has permission from the PEFC Council to issue PEFC trademarks licences and to notify certification bodies on behalf of the PEFC Council. Usually, the authorised bodies are the PEFC National Governing Bodies.

3.24 PEFC National Governing Bodies (PEFC NGBs)
The PEFC National Governing Bodies (PEFC NGBs) are independent, national organisations established to develop and implement a PEFC system within their country. A list of the PEFC NGBs and their contact details can be found on the PEFC website. PEFC NGBs are often also the PEFC authorised body.

3.25 PEFC recognised database
Databases held by the PEFC NGBs, or by the certificate holders of group forest certificates, where any data necessary to implement the forest management certification, such as up-to-date participant data and area covered by the certificate, is captured and maintained and properly protected.

3.26 Special audits
Special audits are unplanned, or otherwise outside the audit programme, and may be done on short notice.

Note: Special audits may be necessary due to scope extension, or to investigate complaints or substantiated concerns.

3.27 Reviewer
A person or a group of persons (e.g., a committee) that has not been involved in the audit process and is assigned by the certification body to review all the information and results related to the audit.

3.28 Substantiated concern
Information or complaint supported by proof or evidence, indicating a serious failure to conform with the requirements of the PEFC endorsed national or regional forest certification system and/or there is a reputational risk for PEFC.

Note: Substantiated concerns can be concerns of third parties, as well as concerns of the client itself.
3.29 Suspended certification
The certification is temporarily invalidated by the certification body.

3.30 Technical expert
A person who provides specific knowledge or expertise to the audit team (Source: definition based on ISO/IEC 17021:2015, clause 3.14.).

*Note:* Specific knowledge or expertise is that which relates to the organisation, the process, or activity to be audited.

3.31 Terminated certification
The certification has been voluntarily cancelled by the client during the validity of the certification cycle.
4. General requirements

4.1 Legal and contractual matters

4.1.1 Certification agreement

4.1.1.1 The certification body shall establish a legally enforceable certification agreement with the client.

4.1.1.2 The certification agreement with the client shall clearly specify:

a) The applicable ISO/IEC standard/s against which the certification body is operating.

b) The certification body’s accreditation status, scope of accreditation, and the accreditation body that issued the accreditation; and,

c) The PEFC notified certification body status, scope of the notification, and the PEFC authorised body that has issued the notification.

4.1.1.3 The certification agreement shall include, at least, the following content:

- Implementation of the requirements:

  a) Client’s commitment to fulfil the certification requirements, including appropriate implementation.

  b) Client’s commitment to implement changes in an agreed transition period when there are changes in the certification requirements.

  c) Client’s commitment to keep records for the compliance with the certification requirements for the duration of the current cycle plus the previous certification cycle.

  d) Client’s obligation to inform the certification body within 30 days of changes that may affect its ability to conform with the certification requirements.

- Audit process:

  e) Client’s commitment to provide access during the certification process to observers from accreditation bodies, PEFC Council and/or the PEFC authorised bodies as well as representative/s of workers and trade unions (e.g., for witnessing activities or validation audits), upon request.

  f) Client’s commitment to make the necessary arrangements for the conduction of the audits and investigation of complaints.

  g) The conditions under which the certification body may conduct special audits, as per 7.6.3, and the client’s commitment to accept those.

- Trademarks use:

  h) Client’s commitment to use the PEFC trademarks and the accreditation trademarks and certification body trademarks in compliance with any applicable requirements and consistent with the scope of certification, and to not make any references or claims that may be misleading or unauthorised or may bring PEFC, certification bodies or accreditation bodies into disrepute.

  i) Upon suspension, withdrawal, or termination of certification, client’s commitment to discontinue its use of all advertising matter that contains any reference to the certification and take action and measures as required by the PEFC endorsed certification system (e.g., the return of certification documents), as appropriate.

  j) Upon suspension, withdrawal, or termination of certification, or if PEFC’s endorsement of the system or standard they are certified against is suspended or terminated, client’s commitment to stop any use of the PEFC claims or PEFC trademarks.
k) If the client provides copies of the certification documents to others, the documents shall be reproduced in their entirety or as specified in the PEFC endorsed certification system.

l) Client’s commitment to keep records of all complaints and substantiated concerns received that relate to compliance with certification requirements.

m) Client’s commitment to take appropriate action with respect to complaints and any deficiencies that affect compliance with the requirements for certification.

n) Client’s commitment to make records of all complaints and substantiated concerns available to the certification body, PEFC Council, the PEFC authorised body, and/or the accreditation body, on request.

4.2 Management of impartiality

4.2.1 The certification body shall put in place procedures to ensure that personnel involved in the certification activities are free from conflict of interest and independent from the client.

4.3 Confidentiality

4.3.1 The certification body shall comply with all applicable privacy and data protection laws.

4.3.2 The certification body shall commit to a data protection related agreement with the PEFC Council and when appropriate, also with PEFC authorised bodies. The agreement shall specify each party’s rights and obligations concerning the protection of personal data. It regulates the particularities of data processing – such as its scope and purpose – as well as the relationship between the controller and the processor.

4.4 Risk based approach

Certification bodies operating sustainable forest management certification shall follow a risk-based approach.
5. Resource requirements

5.1 Personnel involved in the certification activities

5.1.1 General

5.1.1.1 The certification body shall ensure that personnel involved in the certification activities have the relevant and appropriate knowledge and competencies corresponding to these activities, including PEFC-specific knowledge.

5.1.1.2 Any personnel involved in PEFC certification shall have at least basic knowledge of the PEFC system and certification criteria appropriate to their roles and responsibilities.

5.1.1.3 The certification body should ensure a workplace that is safe, provides equal opportunities, is non-discriminatory, promotes gender equality, and is free from workplace intimidation and harassment. Appropriate training and internal policies should be implemented.

5.1.2 Auditors

5.1.2.1 General

The certification body shall have a documented process to ensure that auditors have personal attributes, knowledge, and skills in accordance with the requirements of the PEFC endorsed certification system.

5.1.2.2 Education

5.1.2.2.1 The certification body shall ensure that auditors have the knowledge corresponding to at least a tertiary education.

Note: Tertiary education, also referred to as third stage, third level, and post-secondary education, is the educational level following the completion of a school providing a secondary education. Tertiary education can be obtained, among others, at universities, technical schools, or colleges.

5.1.2.2.2 The certification body shall ensure that auditors have taken formal forestry related courses.

5.1.2.2.3 The specific education relating to forestry (requirement 5.1.2.2.2) can be substituted by working experience in this sector if the certification body can demonstrate it is equivalent to the required education.

5.1.2.3 Working experience

5.1.2.3.1 The certification body shall ensure that auditors have a minimum of three years of full-time professional experience in a relevant discipline (e.g., forestry, trees outside the forest, biodiversity, natural resources management).

5.1.2.3.2 The number of years of total work experience may be reduced by one year if the auditor has completed a tertiary education in forestry, biodiversity, or natural resources management.

Note: Tertiary education, also referred to as third stage, third level, and post-secondary education, is the educational level following the completion of a school providing a secondary education. Tertiary education can be obtained, among others, at universities, technical schools, or colleges.

5.1.2.4 PEFC forest management training

The certification body shall ensure that new auditors have received and successfully completed initial training recognised by the PEFC Council on the PEFC endorsed certification system or systems for the country/countries where they conduct audits before they start their auditing activities.

Note: The PEFC website provides further information on training options.
5.1.2.5 Audit training

The certification body shall ensure that auditors have successfully completed training in audit techniques based on ISO 19011.

5.1.2.6 Audit experience

For the first qualification of an auditor, the certification body shall ensure that the auditor has performed, as auditor-in-training, at least 40 hours of forest management or equivalent audits (e.g., trees outside the forest, ISO 9001, 14001 or 45001 auditing experience in the forestry or related sector, biodiversity, natural resources management) under the leadership of a qualified audit team leader within the last year.

Note: The 40-hour period as auditor-in-training should cover different types of audits (initial, surveillance and recertification).

5.1.2.7 Competencies

5.1.2.7.1 The certification body shall ensure that auditors demonstrate the ability to apply knowledge and skills in the following areas:

a) Principles, objectives, requirements, criteria, and indicators of the PEFC forest management standard Benchmarks, PEFC ST 1003, Sustainable Forest Management - Requirements and PEFC ST 1002, Group Forest Management - Requirements as implemented by the PEFC endorsed certification system, as applicable.

b) Audit principles, procedures, and techniques, and how to apply them appropriately to different audits while ensuring that audits are conducted in a consistent and systematic manner.

c) Managing an organisation, including organisational size, structure, functions and relationships, general business processes, risk management and cultural and social aspects.

d) Appropriate knowledge of the socio-demographics, sustainability issues, cultural issues (including gender equality), indigenous interests and values and indigenous treaties, where applicable, and industrial relations in the region of application of the forest management requirements.

e) Knowledge of legislation, regulations, or other relevant requirements, including:
   i. Contracts and agreements and/or collective bargaining agreements (as applicable).
   ii. Forest governance and law enforcement system of the country, including those covering social, workers and trade union rights and occupational safety and health of workers.
   iii. International conventions relating to worker rights (ILO core conventions).
   iv. International treaties and conventions relating to forestry, forest trade, and tree-based products.

f) The principles of forest management based on techniques, including: inventory, planning, protection, management of forest ecosystems, identification and management of ecologically important forest areas, carbon stocks and biodiversity, as well as technical aspects of forest operations, and their potential impacts.

g) Understanding of and ability to interpret Geographic Information Systems (GIS) as it applies to forest monitoring and management.

h) Management and control of online documents, data and records, confidential data, data privacy and protection; and

i) Application of risk assessment techniques.

5.1.2.7.2 The certification body shall ensure that the audit team consists of individuals who collectively have all the required competencies for the scope of the audit.
5.1.2.8 Maintenance of the qualification as an auditor

5.1.2.8.1 PEFC forest management training

5.1.2.8.1.1 To maintain the auditor qualification, the certification body shall ensure that qualified auditors participate in a PEFC forest management refresher training recognised by the PEFC Council whenever a new version of the forest management standard(s) they are qualified to audit, or the standards with requirements for SFM certification bodies, is published.

5.1.2.8.1.2 The certification body shall ensure that such refresher training is successfully completed before conducting audits against the revised standard.

5.1.2.8.2 Audit experience

5.1.2.8.2.1 To maintain the auditor qualification, the certification body shall ensure that the auditor has performed a minimum of 40 hours of forest management or equivalent audits (e.g. trees outside the forest, ISO 9001, 14001 or 45001 auditing experience in the forestry or related sector, biodiversity, natural resources management) per year.

5.1.2.8.2.2 In exceptional circumstances, such as statutory leave, long-term illness, or lack of opportunities to provide certification services, auditors unable to comply with 5.1.2.8.2.1 shall perform 20 hours of forest management audits under the supervision of a qualified auditor within two years, or undergo a formal evaluation of competencies by the certification body prior to the auditor taking back auditing activities.

5.1.3 Audit team

5.1.3.1 General requirements

5.1.3.1.1 The audit team shall comprise auditor(s) fulfilling the requirements defined in 5.1.2.7.

5.1.3.1.2 The certification body shall have documented procedures for selecting and appointing the audit team, including the audit team leader.

5.1.3.1.3 The certification body shall consider gender balance within the audit team.

5.1.3.2 Technical experts

5.1.3.2.1 The certification body may engage technical experts to support the audit team. Technical experts shall be independent of the client, and their names, qualifications and affiliations shall be included in the audit report.

5.1.3.2.2 The certification body shall ensure that any potential conflict of interest is declared and managed.

5.1.3.2.3 The certification body shall ensure that technical experts report to the audit team leader, only operate under their scope, do not make certification decisions, and do not create findings.

5.1.3.3 Translators and interpreters

5.1.3.3.1 Translators and interpreters used in the audit shall be independent of the client.

5.1.3.3.2 In cases where independent translators and/or interpreters are not available, the names of the translators and their links with the client shall be included in the audit report.

5.1.3.3.3 The certification body shall make sure that any potential conflict of interest is managed.
5.1.4    Reviewers and certification decision makers

5.1.4.1    General

5.1.4.1.1    The certification body shall be responsible for and shall retain authority of its decisions relating to certification.

5.1.4.1.2    The certification body shall ensure that the reviewer and certification decision maker are independent of the audit team and the client.

5.1.4.1.3    The certification body shall ensure that the personnel involved in the reviewing and decision-making process have a legally binding relationship with the certification body that covers personnel’s compliance with the requirements in this standard.

Note: The reviewer and the certification decision maker may be the same individual.

5.1.4.2    Education

5.1.4.2.1    The certification body shall ensure that the reviewer and certification decision maker have the knowledge corresponding to at least a tertiary education.

Note: Tertiary education, also referred to as third stage, third level, and post-secondary education, is the educational level following the completion of a school providing a secondary education. Tertiary education can be obtained, among others, at universities, technical schools, or colleges.

5.1.4.2.2    The certification body shall ensure that reviewers and certification decision makers have taken formal forestry related courses.

5.1.4.2.3    The specific education relating to forestry (requirement 5.1.4.2.2) can be substituted by working experience in this sector if the certification body can demonstrate it is equivalent to the required education.

5.1.4.3    Working experience

5.1.4.3.1    The certification body shall ensure that the reviewer and certification decision maker have relevant experience according to the type of audits to be reviewed.

5.1.4.3.2    The certification body shall ensure that the reviewer and certification decision maker have a minimum of three years of full-time experience in conformity assessment.

5.1.4.3.3    The number of years of total work experience may be reduced by one year if the reviewer and certification decision maker have completed tertiary education in a relevant discipline (e.g., forestry, trees outside the forest, biodiversity, or natural resources management).

Note: Tertiary education, also referred to as third stage, third level, and post-secondary education, is the educational level following the completion of a school providing a secondary education. Tertiary education can be obtained, among others, at universities, technical schools, or colleges.

5.1.4.3.4    A qualified PEFC forest management auditor is considered as already meeting the minimum working experience required.

5.1.4.4    PEFC forest management training

5.1.4.4.1    The certification body shall ensure that new reviewers and certification decision makers have received initial training recognised by the PEFC Council on the PEFC endorsed certification system or systems for the country/countries where they conduct their certification activities.

5.1.4.4.2    The certification body shall ensure that new reviewers and certification decision makers have successfully completed the training before they start their certification activities.

Note: The PEFC website and PEFC endorsed systems’ websites provide further information on training options.
5.1.4.5 Audit training

The certification body shall ensure that the reviewer and certification decision maker have successfully completed training in audit techniques based on ISO 19011.

5.1.4.6 Audit experience

For the first qualification of a reviewer or certification decision maker, the certification body shall ensure that the reviewer or the certification decision maker has participated as an observer in forest management or equivalent audits (e.g., trees outside the forest, ISO 9001, 14001 or 45001 auditing experience in the forestry or related sector, biodiversity, natural resources management) covering at least eight hours. The observation shall include the opening meeting, part of the office assessment, part of the field assessment, and the closing meeting.

5.1.4.7 Competencies

5.1.4.7.1 The certification body shall ensure that the reviewer or certification decision maker demonstrates the ability to apply knowledge and skills in the following areas:

a) Principles, objectives, requirements, criteria, and indicators of the PEFC forest management standard Benchmarks, PEFC ST 1003, Sustainable Forest Management - Requirements and PEFC ST 1002, Group Forest Management - Requirements as implemented by the PEFC endorsed certification system, as applicable.

b) Knowledge of the socio-demographics, sustainability issues, and cultural issues (including gender equality), indigenous interests and values and indigenous treaties, where applicable, and industrial relations in the region of application of the forest management requirements.

c) General knowledge of legislation, regulation, or other relevant requirements pertaining to forest management, labour issues, and data privacy and protection.

d) The principles of forest management.

e) Management and control of online documents, data and records, confidential data, data privacy and protection; and

f) Application of risk assessment techniques.

5.1.4.7.2 The certification body shall ensure that the team of reviewers and certification decision makers consists of individuals who collectively have all the required competencies for the scope of the audit.

5.1.4.8 Maintenance of the qualification as a reviewer or certification decision maker

5.1.4.8.1 PEFC forest management training

5.1.4.8.1.1 To maintain the reviewer or certification decision maker qualification, the certification body shall ensure that the qualified reviewer or certification decision maker participates in a PEFC forest management refresher training recognised by the PEFC Council whenever a new version of the PEFC forest management standard(s) they are qualified to conduct their corresponding certification activities against, or the standards with requirements for SFM certification bodies, is published.

5.1.4.8.1.2 The certification body shall ensure that such refresher training is successfully completed before the reviewer or certification decision maker conducts their certification activities against the revised standard.
5.1.4.8.2 **Audit experience**

To maintain the reviewer or certification decision maker qualification, the certification body shall ensure that the qualified reviewer or certification decision maker has participated as an observer in forest management or equivalent audits (e.g. trees outside the forest, ISO 9001, 14001 or 45001 auditing experience in the forestry or related sector, biodiversity, natural resources management) covering at least 16 hours every two years, and includes part office assessment, part field assessment, and a closing meeting.

**Note:** The observation may take place remotely using ICT.

5.2 **Personnel records and annual monitoring**

5.2.1 The certification body shall maintain records of personnel’s compliance with the requirements of this chapter.

**Note:** Records can be available in digital format.

5.2.2 The certification body shall monitor the performance of forest management auditors annually, applying methods such as reviewing audit reports or clients’ feedback, etc., based on the frequency with which they conduct audits and the level of risk linked to their activities.

5.2.3 As part of the monitoring, the certification body shall conduct an observation of each forest management auditor at least every five years.

5.2.4 The certification body shall maintain documented information on the performance of forest management auditors.

5.2.5 The certification body shall use the monitoring of auditor performance and observations to identify training needs.

**Table: Overview of qualification requirements**

<table>
<thead>
<tr>
<th>Education</th>
<th>Reviewer and certification decision maker</th>
</tr>
</thead>
<tbody>
<tr>
<td>● Knowledge corresponding to at least a tertiary education.</td>
<td>● Relevant experience according to the type of the audits to be reviewed.</td>
</tr>
<tr>
<td>● Formal forestry related courses.</td>
<td>● Minimum of three years of full-time experience in conformity assessment.</td>
</tr>
<tr>
<td>● Specific education relating to forestry can be substituted by working experience in this sector if the certification body can demonstrate it is equivalent to the required education.</td>
<td>● May be reduced by one year if the reviewer and certification decision maker have completed a tertiary education in a relevant discipline (e.g., forestry, trees outside the forest, biodiversity, or natural resources management).</td>
</tr>
<tr>
<td>Working experience</td>
<td>● A qualified PEFC forest management auditor is considered as already meeting the minimum working experience required.</td>
</tr>
<tr>
<td>● Minimum of three years of full-time professional experience in a relevant discipline (e.g., forestry, trees outside the forest, biodiversity, natural resources management).</td>
<td>● May be reduced by one year if the reviewer and certification decision maker have completed a tertiary education in a relevant discipline (e.g., forestry, trees outside the forest, biodiversity, or natural resources management).</td>
</tr>
<tr>
<td>● May be reduced by one year if the auditor has completed a tertiary education in forestry, biodiversity, or natural resources management.</td>
<td></td>
</tr>
<tr>
<td>Training</td>
<td>Audit experience</td>
</tr>
<tr>
<td>----------------------------------------------</td>
<td>-----------------------------------------------------------</td>
</tr>
<tr>
<td>● Initial training recognised by the PEFC Council on the <strong>PEFC endorsed certification system</strong> or systems for the country/countries where they conduct their audit activities, before the start of auditing activities.</td>
<td>● The auditor has performed, as auditor-in-training, at least 40 hours of forest management or equivalent audits under the leadership of a qualified audit team leader within the last year.</td>
</tr>
<tr>
<td>● ISO/IEC 19011</td>
<td>● The reviewer or the <strong>certification decision maker</strong> has participated as an observer in forest management or equivalent audits covering at least eight hours. The observation shall include the opening meeting, part of the office assessment, part of the field assessment, and the closing meeting.</td>
</tr>
<tr>

</table>

*Note:* This table is a summary of the qualification requirements for auditors, **reviewers**, and **certification decision makers**. The actual requirements are in the text of this standard.
6. Information requirements

6.1 Public information

6.1.1 General

6.1.1.1 On request, the certification body shall provide clients and potential clients with details of their fee structure and the estimated cost of obtaining and maintaining certification.

6.2 Certification documents

6.2.1 Certification documents

6.2.1.1 The certificate shall include, as a minimum, the following information:

   a) identification of the certification body
   b) name and address of the client
   c) unique certificate code
   d) type of certificate (individual or group forest)
   e) place and date of issue
   f) the date of granting, extending or renewing certification and the expiry date or recertification due date
   g) logo and/or signature of issuing party
   h) scope of certification and standard or standards against which certification is issued
   i) accreditation mark of the accreditation body as prescribed by the accreditation number (including accreditation number where applicable)
   j) the logo of the PEFC endorsed certification system and the PEFC logo with the certification body’s PEFC trademarks licence number (with a link to the PEFC website and a note that indicates that information on endorsed systems by PEFC is publicly available on the PEFC website); and,
   k) a note indicating that the updated information on the number of hectares covered by the certificate and the number of participants (if group forest certificate) can be checked on the PEFC database

6.2.1.2 The effective date on a certification document shall not be before the date of the certification decision.

6.2.1.3 The certificate code shall be comprised of four pieces of information, each of them separated by a dash, in this order: AAA-PEFCXX-FM-#######(-#), where:

   - AAA is the abbreviation of the certification body. "AAA" is a variable length upper-case abbreviation of the certification body that issued the certificate. It only contains upper case English alphabet characters (A-Z) without any spacing. "CC" is the ISO 3166 Alpha 2 country code (https://www.iso.org/obp/ui/#search) used to differentiate national certification body offices from their central office.
   - PEFCXX. XX is the abbreviation of the country where the forest management standard belongs. For PEFC endorsed certification systems that have their own trademarks or abbreviations (i.e., they do not use ‘PEFC’ in their name), PEFCXX can be replaced by the abbreviation of the PEFC endorsed certification system.
- FM. If a **PEFC endorsed certification system** has more than one forest management standard endorsed by PEFC, or for forest management specific standards, such as Tress Outside Forests (TOF), the FM abbreviation can be adapted accordingly, in coordination with the PEFC Council and/or the **PEFC authorised body**.

- #######: The numeric identification of the certified entity given by the **certification body**.

- (-#) Optionally, the numeric identification of the group **participant** given by the **certification body**, if any.

**Note 1:** The brackets () should not be included in the certificate number, they are for indication only.

**Note 2:** The **certification body** can decide on the numeric identification, in terms of length and digits, and also of the optional numeric identification of the group **participants**.

**Example 1:** XWZ-PEFCRO-FM-877506 (XWZ is a hypothetical abbreviation for a non-existing **certification body**).

**Example 2:** XWZ-SFI-FM-877506 (XWZ is a hypothetical abbreviation for a non-existing **certification body**).

**Example 3:** XWZ-PEFCIN-TOF-877506 (XWZ is a hypothetical abbreviation for a non-existing **certification body**).

6.2.1.4 The **certification body** shall coordinate its abbreviation with the PEFC Council prior to use. Two **certification bodies** shall not have the same abbreviation.

**Note:** The accepted abbreviation for a **certification body** is displayed on the PEFC website, under the Find Certification Bodies section.

6.2.1.5 **Certification bodies** shall use the same abbreviation with all certificate codes on any PEFC recognised **certificate** they issue against a PEFC endorsed forest management standard.

6.2.1.6 If an individual **certificate** covers several forest areas, those areas shall be described on the **certificate**, or an appendix to the **certificate**. Otherwise, the **certificate** shall include a reference to the PEFC database or the corresponding **PEFC recognised database** for the information related to the **certified areas**.

**Note:** PEFC recognised databases are available from the PEFC International database, accessible from the PEFC website.

6.3 Reference to certification and use of marks

6.3.1 Where the **certification body** uses the PEFC trademarks on the certification document, or for any other purposes linked to the **PEFC endorsed certification system**, the use shall only be carried out based on a valid licence issued by the PEFC Council or the **PEFC authorised body**, and in accordance with PEFC ST 2001, **PEFC Trademarks Rules – Requirements**.

6.3.2 The **certification body** shall advise the **client** that the PEFC trademarks on the issued **certificate** only refer to the client’s compliance with the **PEFC endorsed certification system** and do not confer any right to the **client** to use those trademarks unless the **client** holds a valid PEFC trademark licence.

**Note:** The **client** can obtain a PEFC trademark licence from the PEFC Council or the **PEFC authorised body** based on the country where the **client** has its headquarters.
6.4 Confidentiality

6.4.1 The certification body shall limit the collection of personal data from the client to what is essential for the certification purposes. The collection of personal data shall always be conducted in compliance with any applicable legislation.

*Note:* A way to achieve this is by providing generic information as contact person, and generic emails instead of personal emails, e.g., certification manager, certificationmanager@xmail.com.

6.5 Information exchange between the certification body and PEFC Council and/or the PEFC authorised body

6.5.1 The certification body shall immediately inform the relevant PEFC authorised body, or the PEFC Council where the PEFC authorised body does not exist, when certification is granted, suspended, terminated, withdrawn, its scope is changed or any other changes affecting the certification or the information that certification bodies shall report to PEFC.

6.5.2 The certification body shall collect and report information, as required by the PEFC Council or the PEFC authorised body.

6.5.3 The certification body shall verify the area in hectares at each audit and advise the PEFC Council or the PEFC authorised body of any change at least annually.

6.5.4 On request, the certification body shall provide to the PEFC Council or/and the PEFC authorised body any information related to the certification process and the client, such as the full audit report or information on open nonconformities, when there is a concern of reputational risk for PEFC.

6.6 Engagement of affected stakeholders

6.6.1 General

6.6.1.1 The certification body shall verify the effectiveness of the client’s process for the engagement of affected stakeholders during the audit process.

6.6.1.2 During the audit process, the certification body shall consider the information, if any, provided by the affected stakeholders.

*Note:* This engagement process is not intended to bypass the regular complaints process of the client and the certification body.

6.6.2 Engagement process for affected stakeholders

6.6.2.1 The certification body shall have documented procedures for the engagement of affected stakeholders. This procedure shall ensure that any such engagement does not adversely impact impartiality, independence, and confidentiality with respect to the operations of the certification body or the client.

6.6.2.2 The certification body’s procedure for the engagement of affected stakeholders shall include the following steps:

a) verification of the effectiveness of the identification of stakeholders by the client

b) ensuring public notification of the audit by the client

c) engagement with affected stakeholders during the audit process, as necessary

d) summary of the affected stakeholder engagement process in the summary audit reports
6.6.3 Identification of affected stakeholders

6.6.3.1 The certification body shall require the client to provide, in advance of the audit:
   a) information on the client’s identification of affected stakeholders
   b) the relevant needs and expectations of these stakeholders

Note: PEFC ST 1003, Sustainable Forest Management - Requirements, requires in clause 4.2 that the PEFC SFM certification holders shall determine the relevant needs and expectations of the affected stakeholders. b) refers to such identification, as reflected in the applicable PEFC endorsed certification system.

   c) how they are considered within the forest management

6.6.3.2 The certification body shall consider such information when planning the audit.

6.6.4 Public notification of the audit

6.6.4.1 The certification body shall ensure that the dates of an initial or recertification audit are publicised to affected stakeholders, no less than 30 days prior to the audit.

6.6.4.2 The announcement may be made by the client or by the certification body itself.

6.6.4.3 The announcement shall explain that during the audit process, the auditors will assess the client’s engagement with affected stakeholders and shall require the client to seek expressions of interest, in writing, from affected stakeholders.

6.6.5 Engagement with affected stakeholders during the audit process

6.6.5.1 The certification body shall consider feedback received and evaluate its relevance to the assessment of the certification requirements. The certification body shall consult with affected stakeholders as part of the audit process, as appropriate to the feedback received and to any requirements of the standards.

6.6.5.2 The certification body shall employ effective, culturally appropriate means to consult affected stakeholders.

6.6.5.3 The audit plan should allocate sufficient time for engagement with affected stakeholders.

6.6.6 Summary of affected stakeholder engagement process in summary audit reports

6.6.6.1 The summary audit report shall describe the affected stakeholder engagement process, including how affected stakeholder’s comments were taken into account and any issues arising from the process.

6.6.6.2 The certification body shall ensure that the summary audit report does not include any confidential information provided by the affected stakeholders.
7. **Process requirements**

7.1 Pre-certification activities

7.1.1 Application

The **certification body** shall require the applicant **client** to provide the following information as part of the application for forest management certification:

- a) Name and address of applicant **client**, corporate entity (if applicable), and legal status (including legal business registration).
- b) Whether it is an individual or a **group forest certificate**.
- c) Area proposed for certification.
- d) Brief description of the forest proposed for certification and its management.
- e) Summary of technical facilities or resources (e.g., chemical storage, depots, maintenance facilities, firefighting facilities, administrative offices, etc.).
- f) Any relevant information to assess if the application is to be treated as a transfer of certification instead of a new application.
- g) Declaration on the participation of the applicant **client** or the legal predecessor in PEFC or in another certification system for the purpose of forest management in the last five years. This shall include, but not be limited to, suspension, withdrawal, or termination of the certification in the last five years, identified nonconformities, certification decision, justification and any corrective actions that may have been taken and their resolutions.
- h) Name of consultant/s engaged for PEFC certification implementation purposes, if any.

**Note 1:** The information does not have to be obtained at first contact with the applicant **client**, but at least before the application review takes place.

**Note 2:** The **certification body** may require additional information.

7.1.2 Application review

7.1.2.1 The **certification body** shall consider applications when all information listed under 7.1.1 has been provided.

**Note:** 7.1.2.13, 7.1.2.14 and 7.1.2.15 describe the requirements that the **certification body** shall follow when the application is a transfer of an existing **certificate** from one **certification body** to another and not a new application.

7.1.2.2 The **certification body** shall have a documented procedure for the review of applications.

7.1.2.3 The **certification body** shall ensure that the application review identifies and assesses the complexity and scale of the activities covered by the forest management subject to certification.

7.1.2.4 The **certification body** shall have a documented procedure to ensure that it has the competence and capability to provide certification services to the applicant **client**.

7.1.2.5 The **certification body** shall maintain a record of the justification for the decision to accept an application.

7.1.2.6 The **certification body** shall refuse to provide certification services if it lacks the competence or capability to do so.

7.1.2.7 Prior to acceptance, the **certification body** shall define criteria for the acceptance of the applicant **client**.
7.1.2.8 The criteria for acceptance shall identify any current or historical engagement in corrupt practices of the applicant client, or any legal predecessor.

7.1.2.9 The certification body shall evaluate the applicant client against the criteria, including, when relevant, any legal predecessors, and keep records of the evaluation. The evaluation shall determine the suitability of the applicant client for certification prior to acceptance.

7.1.2.10 The certification body shall reject applications where there is evidence of current engagement in corrupt practices.

7.1.2.11 In the case of historical engagement in corrupt practices, the certification body shall not accept the application unless there is evidence that the engagement in corrupt practices has stopped and that the applicant client or its legal predecessor is not subject to any ongoing investigation and/or sanctions.

7.1.2.12 The certification body shall assess the information provided by the applicant client on its participation, or its legal predecessor’s participation, in PEFC or in another certification system for the purpose of forest certification. If participation in PEFC or another certification system was suspended, withdrawn, or terminated, the certification body shall investigate the commitment and capacity of the applicant client to comply with PEFC certification requirements. If the investigation shows an inability or significant likelihood of failure to comply, the application shall not be further processed until the applicant client has demonstrated that it has the ability and commitment to comply.

7.1.2.13 When the certification body determines that the application is to be treated as a transfer of an existing certificate issued by another accredited certification body, the certification body shall operate according to IAF MD2.

7.1.2.14 In the case of transfer of certification, the certification body shall ensure that any open major nonconformities are closed prior to accepting the transfer of the certificate.

7.1.2.15 Transfer of certification is only possible if the accepting certification body is recognised by PEFC for the same system and according to the same accreditation standard.

7.1.2.16 The certification body shall communicate to the applicant client the result of the application review in writing. If the application is rejected, the certification body shall provide the justification to the applicant client in writing.

7.1.3 Audit programme

7.1.3.1 The certification body shall develop an audit programme that covers at least a certification cycle. The audit programme shall be maintained as documented information.

7.1.3.2 The certification body shall confirm the audit programme with the client. The certification body shall ensure that the client agrees with the way the audit will be conducted and the schedule of the audit.

7.1.3.3 The certification cycle shall not exceed five years.

7.1.3.4 When defining the audit programme, the certification body shall consider the information and the results of the application review and the information from prior audits, where applicable.

Note: Guidance for preparing the audit programme is provided by ISO 19011, clause 5.

7.1.3.5 The certification body shall identify season-specific activities and ensure that these are covered within the five-year audit programme.

Example: Season-specific activities are, e.g., forest establishment, seeding and planting or forest fire reduction and related site preparation activities, or inventory that may only happen at a certain season.
7.1.3.6 The **certification body** shall include in each audit (surveillance audits and initial and recertification audits) an assessment of any requirements that cover the following areas, as appropriate:

- a) forest conversion and requirements related to degraded forest
- b) maintenance, conservation, or enhancement of biodiversity and significantly high carbon stock
- c) requirements related to ecologically important forest areas
- d) compliance with fundamental ILO conventions
- e) legal compliance obligations
- f) Indigenous peoples’ rights, customary and traditional rights related to the forest land
- g) health, safety and working conditions

7.1.3.7 Where the **certification body** considers that feedback is critical to assess the client's compliance with certification requirements that may impact affected stakeholders, such as those related to human rights, local communities, customary and traditional rights related to forest land, and health, safety and working conditions, or any other requirements, the **certification body** shall seek feedback from **affected stakeholders**.

7.1.4 Risk-based approach

7.1.4.1 The **certification body** shall determine and document the risk profile associated with each **client**.

7.1.4.2 The **certification body** shall periodically review the risk profile and adjust the **audit programme** and the **audit plans** accordingly.

7.1.4.3 The **certification body** shall ensure that the **audit programme** and **audit plans** for each **client** are developed in consideration of the client’s risk profile.

7.1.4.4 The **PEFC endorsed certification system** shall specify the indicators to be considered as part of the risk assessment.

**Note 1:** The risk profile will assist in determining the duration of the initial and Stage 2 (certification) assessments and the development of the **audit programme** and **audit plans**, including surveillance and recertification assessments.

**Note 2:** Information on how to conduct a risk assessment can be found in ISO 31000.

7.1.5 Determining audit time

7.1.5.1 The **PEFC endorsed certification system** shall define requirements for determining and calculating the audit time and should consider the following criteria:

- a) area covered by the **certificate** and changes to the **certified area**
- b) forest types, locations, silviculture and geography
- c) number of **participants**, size and structure
- d) number of effective full
- e) time workers (including contractors and subcontractors)
- f) number and location of offices, depots, workshops, visitors’ facilities, fire towers and/or other infrastructure that is fundamental to the management of the forest
- g) any outsourcing of any activities included in the scope of the forest management standard
- h) season-specific activities
- i) other issues such as surrounding transport, roads, and sale of forest products, if applicable
j) management system, including complaints resolution process, the effectiveness of the client’s internal monitoring, internal audit and review processes

k) the results of any prior audits, including those of client’s management systems

l) risk indicators and results from the risk assessment as per 7.1.4.

m) geolocation of the forest management unit and potential checks using remote sensing tools to identify risk for deforestation or degradation within the area

7.1.5.2 The certification body shall have a procedure to calculate audit time as defined by the PEFC endorsed certification system.

7.1.5.3 The certification body shall determine the audit time, and the justification for the determination shall be maintained as documented information.

7.1.6 Sampling

7.1.6.1 The certification body shall develop a sampling plan that considers the risk assessment results.

7.2 Planning

7.2.1 Determining audit objectives, scope, and criteria

7.2.1.1 The certification body shall clearly define the scope, extent, and boundaries of the audit, such as participants, organisational units, activities, and processes to be audited.

7.2.1.2 The certification body shall plan the tools and audit techniques that will be used during the audit. It shall be clearly defined for which purpose the tools and techniques are used and which requirements are covered by which tools and techniques, if applicable.

7.2.1.3 The certification body shall consider the following criteria when defining the scope:

a) Representation: the client’s operations and processes shall be randomly but representatively considered. The certification body shall determine the processes that it considers important to be evaluated. The effectiveness of these processes shall be reflected in the audit report.

b) Protection: areas with high impact on the achievement of the objectives of the forest management standard and identified ecologically important forest areas shall be considered.

c) Correction: high risk areas and areas with previously identified nonconformities shall be considered.

d) Prevention: the areas to be audited shall be determined by the certification body after its risk assessment.

7.2.2 Audit plan

7.2.2.1 The certification body shall have documented procedures to establish a risk-based audit plan for each audit and selected participant. The audit plan shall provide the basis to conduct and schedule the audit activities.

7.2.2.2 The certification body shall consider existing complaints and substantiated concerns when planning the audit.

7.2.2.3 The audit plan, including the dates for the audits, shall be communicated no less than ten days in advance and agreed upon with the client.

Note: Guidance for preparing the audit plan is provided by ISO 19011:2018, clause 6.3.2.

7.2.2.4 The certification body shall define the timelines for the submission of the audit report by the certification body to the client for confirmation of the findings.
Note: The certification body may increase the timelines for submission of the audit report in circumstances where more time is needed to assess fully the information that has come to hand during an audit. In such circumstances, the certification body shall advise the client accordingly and provide written justification for the additional time. The certification body shall note any such change in the summary audit report.

7.3 Initial certification

7.3.1 Stage 1

7.3.1.1 The Stage 1 audit has the function of a document and “readiness” review. The scope of this Stage 1 audit shall comprise, at least:

a) Confirming the scope and objective of the certification audit.

b) Confirming the participants, locations, and activities covered by the sustainable forest management system.

c) Auditing the client’s forest management documentation.

d) Evaluation of any forest management area specific conditions, as applicable.

e) Evaluating the client’s procedures for internal audits and management system integrity and the effectiveness of their implementation.

f) Determining the conformity of the client’s procedures for using the PEFC trademarks and using the PEFC endorsed certification system trademarks, if applicable.

g) Evaluating the client’s identification of affected stakeholders, their needs and expectations, and how those are considered within the forest management, and consider feedback received from affected stakeholders during the public notification of the audit and evaluate its relevance.

h) Determining risks to be considered in the Stage 2 audit.

i) Finalising the audit plan for the Stage 2 audit.

7.3.1.2 The Stage 1 audit may be conducted remotely using ICT, according to 7.4.3.

7.3.2 Stage 2

7.3.2.1 The certification body shall assess the client’s implementation of the system requirements, including its forest management system, processes, and procedures. The Stage 2 audit shall include an in-the-forest assessment of the client’s forest management activities. Where appropriate, the certification body may conduct parts of the Stage 2 audit remotely using ICT, in accordance with 7.4.3.

Note: Examples of elements of the audit plan where ICT could be used are interviews with employees, and review of information in electronic format.

7.3.2.2 The audit plan for the Stage 2 audit shall be adapted based on any substantiated concerns and the findings from the review conducted in the Stage 1 audit.
7.4 Conducting audits

7.4.1 Conducting the opening meeting

In cases where some or all elements of the audit are conducted remotely, the certification body may conduct the opening meetings remotely using ICT according to IAF MD4, and any other requirements established by this standard.

7.4.2 Conducting the closing meeting

7.4.2.1 The audit team leader shall conduct a closing meeting with the certification management and senior management of the client to present the audit findings, and any recommendations related to continued certification. The list of attendees in this meeting shall be recorded.

7.4.2.2 The audit team leader shall ensure that the client is able to understand the conclusions and especially all the nonconformities found.

7.4.2.3 In cases where some or all elements of the audit are conducted remotely, the certification body may conduct the formal closing meeting remotely using ICT according to IAF MD4 and any other requirements established by this standard.

7.4.3 Remote audits

7.4.3.1 The certification body may use, where appropriate, ICT methods to conduct remote audits for:
   a) Stage 1 of the initial certification
   b) elements of the surveillance audits or a full surveillance audit
   c) special audits
   d) non-field parts of Stage 2 of the initial certification audit
   e) non-field parts of the recertification audit

Example: Non-field parts of Stage 2 of the initial audit or recertification audit are the closing meeting, closure of nonconformities or administrative work.

7.4.3.2 Audits may include ICT methods beyond requirement 7.4.3.1 when exceptional circumstances do not allow the auditors to conduct an in-field visit of the client.

Note: Exceptional circumstances include restrictions because of national or local rules or health risks.

7.4.3.3 The certification body shall have documented procedures for conducting remote audits or parts of audits remotely using ICT, which includes, as a minimum:
   a) criteria and indicators to assess the appropriateness of the use of ICT
   b) risks associated with its use and how they may impact audit effectiveness
   c) available technology and how it will be used
   d) eligibility criteria of the client (e.g., accessibility of digital files, access to documented management system)
   e) client capacities
7.4.3.4 The **certification body** shall conduct an assessment of the risks and opportunities associated with the use of **ICT** and the justification of their use. The **certification body** shall maintain **documented information** on this assessment.

7.4.3.5 Certification processes may include **ICT** when:

   a) The effectiveness and/or efficiency of the audit can be increased with **ICT** while maintaining the integrity of the audit/assessment process.

   b) The **certification body** can justify that the audit techniques used deliver sufficient confidence in the client's compliance with the certification criteria.

   c) The certification body's assessment as per 7.4.3.4, according to its procedure to conduct remote audits as per 7.4.3.3, results in a low risk when conducting the audit or part of the audit remotely.

   d) The **client** has a centrally controlled management system accessible remotely and provides the **certification body** with the necessary records to conduct the audit or parts to the audit remotely.

7.4.3.6 The **certification body** shall ensure that auditors using **ICT** have been provided with appropriate training and are qualified for the use of **ICT**.

7.4.3.7 The **certification body** shall seek confirmation of acceptance from the **client** prior to the use of **ICT** during the audit.

7.4.3.8 Prior to the audit, the **certification body** shall define the **ICT** to be used and ensure its efficiency and effectiveness through testing and any other appropriate means.

7.4.4 **Summary audit report**

7.4.4.1 In addition to the audit report, the **certification body** shall prepare a summary of the audit report.

7.4.4.2 The summary audit report shall include, as a minimum, the following information:

   a) Name and description of the **certification body**, the client's name and description, and the report's date.

   b) Number of hectares at the time of the audit.

   c) Description of the **certified area**.

   d) Audit scope, objectives, and process, including standard/s and applied certification criteria, a summary of risk assessment, and if remote technology is used, technology and justification for the use.

   e) Summary of the **audit plan**, including dates, stakeholder engagement process, locations and activities assessed, audit duration (split by proportion spent on-site and remotely – where relevant) and number of **participants** on the audit team, its qualifications and experience.

   f) Audit results:

      i. summary of findings demonstrating conformity or nonconformity

      ii. brief description of any **major nonconformities** and verification of the effectiveness of the actions taken to address the nonconformities

      iii. brief description of **minor nonconformities**

      iv. evaluation of the effectiveness of the action taken to address any **minor nonconformities** in previous audit reports, and

      v. recommended certification decision
7.4.4.3 The summary audit report shall not include confidential data.

7.4.4.4 The certification body shall provide a copy of the summary audit report to the client, the PEFC Council, and/or the PEFC authorised body.

7.4.4.5 On request by either the client, the PEFC Council, or the PEFC authorised body, the certification body shall provide a copy of the summary audit report in English.

7.4.4.6 The summary audit report shall be made publicly available on the PEFC database, which is externally accessible through the PEFC website.

7.4.5 Cause analysis of nonconformities

7.4.5.1 The certification body shall classify nonconformities identified during the audit as major and minor.

7.4.5.2 The certification body shall require the client to:
   a) determine the root cause of the nonconformity
   b) develop a corrective action plan to address the identified cause
   c) specify a timeframe for completion, and
   d) assign responsibilities for the implementation of the action plan

7.4.5.3 Before the action plan is implemented, the certification body shall assess the action plan provided by the client, including the timeframe and personnel responsible. As part of the assessment, the certification body shall verify that the action plan adequately addresses the nonconformities.

7.4.5.4 When an action plan is rejected, the certification body shall explain why and allow the client to review and re-submit it.

7.4.6 Effectiveness of corrections and corrective actions

7.4.6.1 The certification body shall evaluate the effectiveness of corrective action(s) for all nonconformities identified in audits prior to closing the nonconformities.

7.4.6.2 The certification body shall verify major nonconformities on-site unless verification can be undertaken without on-site verification using ICT. The certification body shall justify and document why verification can be undertaken through ICT.

7.4.6.3 The time period for completion of the corrective action(s) for major nonconformities identified in audits and their verification by the certification body shall follow the rules of the certification body but not exceed three months.

7.4.6.4 If specific natural conditions or extraordinary circumstances do not allow the implementation of corrective actions within the timeframes described in 7.4.6.3, the certification body may give an exemption. The maximum time period is 12 months, and the justification shall be documented.

Example: Extraordinary circumstances could include a pandemic situation, civil conflict, lack of security, or a natural disaster.

7.4.6.5 The certification body shall verify the effectiveness of corrective action(s) for minor nonconformities no later than at the next audit.

7.4.6.6 Where the actions taken to address a major nonconformity have not effectively addressed the issue within the time frame agreed with the certification body, the certification body shall either suspend or withdraw the certificate, as appropriate.
The certification body shall have procedures for immediate suspension or withdrawal of the certificate in cases of identification of non-reversible nonconformities or in case of intentional corrupt or fraudulent activities by the client.

Note 1: Non-reversible nonconformities are deliberate, serious, and significant major nonconformities that cannot be remedied in a reasonable time frame.

Note 2: Fraudulent activities include infringement of legislation.

7.5 Certification decision

7.5.1 General

7.5.1.1 Before granting initial certification and recertification, the certification body shall:

a) review, accept and verify the correction and corrective actions for any major nonconformities

b) review and accept the plan for correction and corrective actions for minor nonconformities

7.5.2 Certification status

7.5.2.1 The certification body shall define the status of the certification as:

a) Valid
b) Suspended
c) Withdrewnd) Terminated
e) Expired

Note: Additionally, when a national or regional forest management standard or certification system loses PEFC endorsement or the endorsement is suspended, the PEFC Council considers any certificates issued against the standard or system as not PEFC recognised. The status is correspondingly updated on the PEFC website and clients affected by the suspension or termination are no longer allowed to make PEFC claims or use the PEFC trademarks in any way.

7.5.2.2 If certification is terminated, suspended, or withdrawn, or the PEFC Council suspends or terminates the endorsement of the certification system, the certification body shall inform the client that any further use of the PEFC trademarks and claims is not allowed. In case of suspension, the certification body shall monitor whether the client is in compliance.

7.6 Maintaining certification

7.6.1 Surveillance activities

7.6.1.1 Surveillance audits shall be carried out at least annually. The certification body shall carry out at least four surveillance audits before the certificate's expiry date.

Note 1: Annually means once every twelve months, plus or minus three months.

Note 2: If the certificate is valid for less than five years, the number of surveillance audits can be reduced accordingly.

7.6.1.2 In justified circumstances, the frequency of surveillance audits may be increased by the certification body according to the level of overall risk related to the profile of the client and the results of previous audits.
7.6.1.3 Parts of the surveillance audit or the full surveillance audit, where appropriate, may be conducted remotely using ICT in accordance with 7.4.3 if:

a) no major nonconformity was raised during the previous audit
b) minor nonconformity/ies can be verified remotely, and
c) the client has a centrally controlled management system accessible remotely and provides the certification body with all the records required to conduct the audit

7.6.1.4 The certification body shall not carry out more than two consecutive full surveillance audits using completely remote means.

7.6.2 Recertification

7.6.2.1 The recertification audit shall take place on-site. Certain parts of the recertification audit, such as the opening meeting, the closing meeting, and closure of minor nonconformities or other administrative processes, e.g., system documentation, review of the internal audit or of the client’s management review, may take place remotely, as per 7.4.3. The audit plan shall identify which components of the audit can be effectively conducted remotely.

7.6.3 Special audits

7.6.3.1 General

7.6.3.1.1 The certification body may conduct different types of special audits, according to the requirements of this chapter.

7.6.3.1.2 The full special audit, or certain components of the special audit, such as the opening and closing meetings, or closure of minor nonconformities and administrative processes, may take place remotely, as per 7.4.3. The audit plan shall identify which components of the audit can be effectively conducted remotely.

7.6.3.2 Expanding scope

The certification body may conduct expanding scope audits when a request for scope extension is made by the client. Scope expansion requires an assessment to decide whether the extension can be granted.

Note: Expanding scope audits may happen where there is a significant change to the defined certified forest area. An expansion of scope may happen, for example, to accommodate new forest types or a significant change in the forest management.

7.6.3.3 Unannounced or short-notice audits

7.6.3.3.1 Unannounced or short-notice audits may take place when the certification body has a substantiated concern that the client is knowingly breaching a requirement in the standard.

7.6.3.3.2 The certification body may suspend or withdraw a certificate if the client does not accept an unannounced or short-notice audit without justified circumstances.

7.6.3.3.3 The certification body shall define the conditions under which it carries out unannounced or short-notice audits and inform the client accordingly.

7.6.3.3.4 The conditions shall include the investigation of substantiated concerns and other reasons.
7.7 Appeals

7.7.1 The certification body shall have a documented appeals process whereby clients can appeal certification decisions.

*Note:* The term appeal is defined in ISO 17000:2020.

7.7.2 The certification body shall make publicly available its appeal procedure, including clear timelines.

7.8 Complaints

7.8.1 The certification body shall have a documented complaints process whereby any person or organisation can raise complaints in relation to the certification process.

*Note:* The term complaint is defined in ISO 17000:2020.

7.8.2 This process shall include at least a publicly available mechanism for stakeholders to report instances of potential misrepresentation or corruption.

7.8.3 The certification body shall make its complaints process publicly available, including clear timelines.

7.8.4 The certification body shall inform the complainant about its investigations, the corresponding results and, when necessary, the action to be taken by each party.

7.8.5 The certification body shall inform the PEFC authorised body within seven days of becoming aware of a substantiated concern. The certification body shall also inform the client and/or the PEFC Council when appropriate.

7.8.6 On request by the PEFC authorised body, the certification body shall provide the details of the investigation, including the results, related to a substantiated concern and complaint about a client. On request, the information shall also be provided to the PEFC Council.

7.8.7 On request by the PEFC authorised body, the certification body shall provide a summary of the complaints it has received, as they pertain to the PEFC endorsed certification system. This summary shall be provided in English upon request by the PEFC authorised body.

*Note:* The PEFC authorised body will specify the specified period of time that the summary should cover and the information the summary should cover. This summary may cover:

a) identification of the appellant/complainant (subject to disclosure)

b) identification of the client, including certificate number (if group certification, identification of the participant/s affected by the complaint)

c) description

d) subject of the complaint

e) summary of the complaint handling process

f) requirement not complied with

g) evidence

h) outcome/resolution of the complaint

7.8.8 The certification body shall provide to the PEFC Council and the PEFC authorised body, on request, any information of their investigation of a substantiated concern received against a client.
8. Management system requirements

8.1 General

8.1.1 The certification body shall have a system in place to maintain knowledge of and track changes in local, national, and international legislation on forest management applicable to its clients.

Note: A list of applicable legislation can be found in Appendix 6.

8.1.2 On request, the certification body shall provide to the PEFC Council or the PEFC authorised body any information necessary for PEFC monitoring activities, including, but not limited to, management of risks of conflict of interest or impartiality and certification body rules and procedures for identifying and dealing with non-compliance by clients.

8.1.3 In addition to the complaints and appeals mechanisms, the certification body shall conduct monitoring activities to identify and mitigate misrepresentation or corruption.

8.1.4 The certification body shall protect the confidentiality and safety of affected stakeholders or any other person providing information in relation to PEFC certification, such as complaints and appeals.

8.2 Internal audits of the certification body

8.2.1 On request, the certification body shall provide a summary of the results of its annual internal audits, limited to the performance of PEFC forest management certification, to the PEFC Council or the PEFC authorised body.
Appendix 1 (normative): Group Forest Management Certification

1. Introduction
This appendix includes complementary requirements to those on the main body of this standard, to be implemented by certification bodies operating group certification. This Appendix shall be implemented together with the main text of the standard. The objective of these complementary requirements is to ensure that the audit provides adequate confidence in the conformity of the group certification client’s forest management with the forest management standard, across all participants, and that the audit is practical and feasible in both economic and operative terms.

2. Legal and contractual matters

2.1 Certification agreement

2.1.1 The certification agreement shall allow the certification body to carry out the certification activities for all participants of the group certification.

3. Information requirements

3.1 Certification documents

3.1.1 Certificate

3.1.1.1 For group certification, the certification body shall issue one single certificate with the name and address of the group entity of the client. The certificate shall include a reference to the PEFC database or the corresponding PEFC recognised database for the information relating to the participants covered by the certificate. The scope or other reference on the certificate shall make clear that the scope of the management system covers all participants in the list.

Note: PEFC recognised databases are available from the PEFC International database, accessible from the PEFC website.

3.1.1.2 The certification body shall have access to the list of all participants, including their contact details, identification of their forest property and its/their size(s), and any other information as required by the PEFC Council or the PEFC authorised body, which the group entity maintains. This information shall also be accessible to the PEFC authorised body and/or the PEFC Council.

3.1.1.3 Where a sub-certificate is issued to the participants, it shall contain the same scope, or a sub-scope of that scope, and include a clear reference to the main certificate. The sub-certificate shall include a statement saying, “the validity of this sub-certificate depends on the validity of the main certificate, which shall be verified in the PEFC database”. In cases where the sub-certificate also includes a sub-certificate number, it shall be linked to the main certificate number and be included in the certificate.

4. Process requirements

4.1 Pre-certification activities

4.1.1 General

4.1.1.1 The certification body shall provide information to the client about the eligibility criteria and applicable requirements for group certification, before starting the audit process.
Note: Eligibility criteria for the group organisation, including definitions, are included in PEFC ST 1002, Group Forest Management Certification – Requirements, as implemented in the PEFC endorsed certification system. In addition to general eligibility criteria, PEFC ST 1002, Group Forest Management Certification – Requirements, as implemented in the PEFC endorsed certification system, contains requirements concerning functions and responsibilities of the group entity and the participants of a group certification model.

4.1.2 Application review

4.1.2.1 In addition to the name and address of the applicant client, corporate entity (if applicable), and legal status (including legal business registration) (as per requirement 7.1.1a.), for a group forest certificate, the certification body shall require the applicant client to provide the following information as part of the application: number of participants, summary of their forest area, location and access to the documented information where the register of participants is maintained, is also required.

4.1.2.2 The certification body shall identify the group entity of the client that is its contractual partner and has full responsibility for the performance of the applicant client.

4.1.2.3 If any of the eligibility criteria for the group certification are not met, the certification body shall reject the application (if it is an initial audit) or suspend the certificate (if it is a surveillance or recertification audit).

4.2 Planning

4.2.1 Audit programme

4.2.1.1 The certification body shall have documented procedures for group certification.

4.2.1.2 The certification body shall establish the way the certification body satisfies itself, inter alia, that the forest management requirements are applied to all the participants and that the management system certification is effectively implemented by all the participants and ensures that the criteria in the forest management standard are met.

4.2.2 Determining audit time

4.2.2.1 The certification body shall be able to demonstrate its justification for the time spent on group certification audits in terms of its overall policy for allocation of audit time and as determined by the PEFC endorsed certification system.

4.3 Sampling

4.3.1 General

4.3.1.1 The certification body shall have procedures for the selection of participants in the audit programme/plans. As a minimum, these procedures shall include:

   a) determination of sample categories
   b) determination of the sample size
   c) selection of the participants

Requirements for Certification Bodies operating Certification against PEFC Endorsed Forest Management Standards
4.3.2 Determination of the sample size

4.3.2.1 Generally, the size of the sample to be audited individually should be:

For initial and recertification audits, the square root of the number of the participants to be visited during the internal audits, rounded to the upper whole number.

\[ y = \sqrt{x} \]

\( y \) = number of participants to be visited during the external audit
\( x \) = total number of participants visited during the internal audit

For surveillance audits: the square root of the number of the participants to be visited during the internal audit, reduced by a factor 0.5 and rounded to the upper whole number.

\[ y = 0.5 \sqrt{x} \]

\( y \) = number of participants to be visited during the external audit
\( x \) = total number of participants visited on the internal audit

Note: The number of participants refers to the minimum number of participants to be visited according to PEFC ST 1002, Group Forest Management Certification - Requirements.

4.3.2.2 The size of the sample for external audits can be adapted by the PEFC endorsed certification system taking into account one or more of the following indicators:

a) results of a risk assessment. In this case deviations of sample sizes in case of low or high risk for individual categories shall be defined

b) results of internal audits or previous certification audits

c) quality/level of confidence of the internal monitoring programme

d) use of technologies allowing the gathering of information concerning specific requirements

Note 1: Such technologies may include the use of remote sensing that allows compliance statements for specific requirements of a sustainability standard.

e) based on other means of gathering information about activities on the ground

4.3.2.3 The calculated sample shall be distributed between the categories established by the PEFC endorsed certification system.

4.3.2.4 When appropriate, the certification body shall increase its sampling frequency according to results from previous internal and external audits.

4.3.3 Selection of participants

4.3.3.1 The PEFC endorsed certification system shall define criteria for the selection of participants based on risk.

Note: The risk indicators could be the largest areas, biodiversity values, geology, soil type, forest type, species, ecologically important forest areas, etc.

4.3.3.2 The sampling method shall include random selection. Random selection shall represent at least 25% of the sample.

4.3.3.3 The participants selected for the audit through the sampling shall vary from year to year, unless specific circumstances require some of the participants to be audited in consecutive audits (e.g., size of the forest area).
4.3.3.4 In selecting the participants, the certification body shall select a sample of participants that have undergone internal auditing during the current certification cycle of five years, in order to be able to inspect the system stability, and a sample of participants that have not undergone the internal audit.

Note: Requirements for group certification and internal audits are described in PEFC ST 1002, Group Forest Management Certification - Requirements and the corresponding national and regional adaption of this standard.

4.4 Conducting audits

4.4.1 Cause analysis of nonconformities

4.4.1.1 When nonconformities are found at any individual participant, either through the client’s internal auditing or through the certification body’s audit, an investigation shall take place to determine whether the other participants may be affected.

4.4.1.2 The certification body shall require the client to conduct a root cause analysis to review the nonconformities to determine if there is a risk of a forest management system deficiency applicable to all participants.

4.4.1.3 If risks of a forest management system deficiency applicable to all participants are identified, the certification body shall require the client to implement corrective actions at both group entity and individual participant levels.

4.4.1.4 If, during the audit, the certification body identifies a nonconformity in one or more participants that may lead to a systemic failure, the nonconformity shall be raised at the group level.

4.4.1.5 If the number of nonconformities in individual participants identified during the audit may signify a systematic problem with the group’s internal management system, nonconformities shall be issued to the whole group.

4.4.1.6 It shall not be admissible that, to overcome the obstacle raised by the existence of a nonconformity in one single participant, the client seeks to exclude from the scope the "problematic" participant during the certification process.
Appendix 2 (normative): Accreditations accepted by the PEFC Council

1. Forest management or product certification shall be carried out by certification bodies who are accredited by accreditation bodies that are signatories of the Multilateral Recognition Arrangement of IAF or a regional organisation such as the European co-operation for Accreditation (EA), Interamerican Accreditation Cooperation (IAAC), Asia Pacific Accreditation Cooperation (APAC) etc. The accreditation body shall be a signatory to the IAF MLA with a main scope of ISO/IEC 17021-1.

   Note: Under exceptional circumstances, the PEFC Board of Directors may accept PEFC endorsed certification systems based on ISO/IEC 17065. Specific accreditation requirements for certification bodies providing certification against systems based on ISO/IEC 17065 are included in Appendix 4 of this standard.

2. The scope of accreditation shall explicitly mention the PEFC endorsed forest management standard/s and, when applicable, group certification standard/s, against which the accreditation is held, including the version and the year of the standard the accreditation certificate covers.

   Note: The list of PEFC endorsed certification systems, including the standards, is publicly available from the PEFC website.

3. The scope of accreditation shall explicitly state the certification body is accredited against ISO/IEC 17021-1.

   Note: As part of the accreditation assessments, accreditation bodies should consider conducting stakeholder consultation on the performance of the certification body, in addition to in-field evaluation.

4. On request, the accreditation certificate shall be available in English.
Appendix 3 (normative): PEFC notification of certification bodies

(Requirements are not applicable to the accreditation of the certification body)

1. Certification bodies operating PEFC recognised forest management certification shall be notified by the PEFC Council or the relevant PEFC authorised body of the specific country in which they operate.

2. The notification shall require that the certification bodies shall have a valid accreditation according to Appendix 2 of this standard.

3. The certification body shall provide the relevant PEFC authorised body with information on granted certifications as specified by the relevant PEFC authorised body.

4. If required by the relevant PEFC authorised body, the certification body shall pay a PEFC notification fee to the PEFC authorised body.

5. To ensure the independence of certification bodies, the PEFC notification conditions implemented by the PEFC Council or the PEFC authorised body shall only cover:
   a) administrative conditions (e.g., communication of the certification body with the PEFC NGBs or the PEFC Council, transfer of information, etc.).
   b) financial conditions (fees imposed on certified entities).
   c) compliance with requirements for certification bodies verified through accreditation as described in this standard.

6. The PEFC notification conditions shall not discriminate against certification bodies or create trade barriers.

7. Notification contracts shall include any necessary clauses to cover obligations and responsibilities regarding confidentiality and data use.
Appendix 4 (normative, if applicable): Additional requirements for certification bodies providing certification against PEFC endorsed certification systems based on ISO/IEC 17065

1. General

PEFC forest management certification is considered management certification and, therefore, based on ISO/IEC 17021-1. Under exceptional circumstances, the PEFC Board of Directors may accept the endorsement of systems with forest certification based on product certification, and therefore based on ISO/IEC 17065. This appendix establishes additional requirements that PEFC endorsed certification systems based on ISO/IEC 17065 shall fulfil.

Certification bodies operating PEFC endorsed certification systems based on ISO/IEC 17065 shall hold an accreditation against ISO/IEC 17065 and shall apply the requirements from the body text of this standard, plus the specific requirements and clarifications on this appendix, together with ISO/IEC 17065.

Please note that the numbering in this appendix does not match the numbering of the body text of this standard.

2. Normative references

The following referenced documents are indispensable for the application of this standard under ISO/IEC 17065. The latest edition of the referenced document (including any amendment) applies for both dated and undated references.

ISO/IEC 17065, Conformity assessment – Requirements for bodies, certifying products, processes and services
ISO/IEC 17067, Conformity assessment – Fundamentals of product certification and guidelines for product certification systems
ISO/IEC 17021-1, Conformity assessment – Requirements for bodies providing audit and certification of management systems – Part 1: Requirements

3. Definitions

3.1 Audit

Process for obtaining relevant information about an object of conformity assessment (the entity to which these requirements apply) and evaluating it objectively to determine the extent to which specified requirements are fulfilled.

Note: The term “audit” used in this document is equivalent to the term “evaluation” used in ISO/IEC 17065. This definition is based on ISO/IEC 17000.

3.2 Certification body

For certification bodies operating PEFC endorsed certification systems based on ISO/IEC 17065, a certification body is a third-party conformity assessment body operating certification against a PEFC endorsed certification system, which is accredited for that system according to ISO/IEC 17065 by an accreditation body member of IAF MLA.
4. General requirements

4.1 General

For systems based on ISO/IEC 17065, the principles according to ISO/IEC 17067:2013 type 6 shall be applied.

4.2 Risk based approach

Certification bodies operating sustainable forest management certification shall follow a risk-based approach and apply all the principles given in clause 4.8 of ISO/IEC 17021-1.

5. Resource requirements

5.1 Personnel involved in the certification activities

5.1.2 Auditors

The certification body shall have a documented process to ensure that auditors have personal attributes, knowledge, and skills in accordance with the requirements of the PEFC endorsed certification system and ISO/IEC 17021 Annexe A point A.2.1 to point A.2.11.

5.1.3 Audit team

5.1.3.1 General requirements

All the requirements given in clause 9.2.2 of ISO/IEC 17021-1 shall apply to any certification body providing sustainable forest management certification.

5.1.4 Reviewer and certification decision maker

5.1.4.1 General

The certification body shall ensure that the person or group involved in the reviewing and decision process comply with the competence requirements as set out in ISO/IEC 17021-1 Annex A 3.

6. Process requirements

6.1 Pre-certification activities

6.1.4 Risk-based approach

The certification body shall conduct audits according to a risk-based approach. In addition to the requirements highlighted within this standard, any risk-based approach related requirements from ISO/IEC 17021 apply as well to systems based on ISO/IEC 17065 (such as ISO/IEC 17021, clause 4.8).

6.2 Planning

6.2.4 Multiple management system standards

All the requirements given in clause 9.1.6 of ISO/IEC 17021-1 shall apply.

Note: When planning audits according to multiple management system standards, it shall ensure adequate risk-based on-site auditing.
6.3 Conducting audits

6.3.1 General

All the requirements given in clause 9.4 of ISO/IEC 17021-1 apply.

6.4 Maintaining certification

6.4.1 Recertification

All the requirements given in clause 9.6.3 of ISO/IEC 17021-1 apply.

6.5 Records

6.5.1 All clause 9.9 requirements of ISO/IEC 17021-1 apply.

7. Accreditations accepted by the PEFC Council

7.1 Forest management or product certification shall be carried out by certification bodies who are accredited by accreditation bodies that are signatories of the Multilateral Recognition Arrangement of IAF or a regional organisation such as the European co-operation for Accreditation (EA), Interamerican Accreditation Cooperation (IAAC), Asia Pacific Accreditation Cooperation (APAC) etc. The accreditation body shall be a signatory to the IAF MLA with a main scope of ISO/IEC 17065, as corresponds to the requirements of the PEFC endorsed certification system.

7.2 The scope of accreditation shall explicitly mention the PEFC endorsed forest management standard/s and when applicable, group certification standard/s, against which the accreditation is held, including the version and the year of the standard the accreditation certificate covers.

*Note:* The list of PEFC endorsed certification systems, including the standards, is publicly available on the PEFC website.

7.3 The scope of accreditation shall explicitly state the certification body is accredited against ISO/IEC 17065.

*Note:* As part of the accreditation assessments, accreditation bodies should consider conducting stakeholder consultation of the performance of the certification body, in addition to in-field evaluation.

7.4 On request, the accreditation certificate shall be available in English.

### 5.1.2.7 Competencies

#### 5.1.2.7.1 The certification body shall ensure that auditors demonstrate the ability to apply knowledge and skills in the following areas:

a) Principles, objectives, requirements, criteria, and indicators of the PEFC forest management standard Benchmarks, PEFC ST 1003, *Sustainable Forest Management - Requirements* and PEFC ST 1002, *Group Forest Management - Requirements* as implemented by the PEFC endorsed certification system, as applicable.

b) Audit principles, procedures, and techniques, and how to apply them appropriately to different audits while ensuring that audits are conducted in a consistent and systematic manner.

c) Managing an organisation, including organisational size, structure, functions and relationships, general business processes, risk management and cultural and social aspects.

d) Appropriate knowledge of the socio-demographics, sustainability issues, cultural issues (including gender equality), indigenous interests and values and indigenous treaties, where applicable, and industrial relations in the region of application of the forest management requirements.

e) Knowledge of legislation, regulations, or other relevant requirements, including:

   i. Contracts and agreements and/or collective bargaining agreements (as applicable).

   ii. Forest governance and law enforcement system of the country, including those covering social, workers and trade union rights and occupational safety and health of workers.

   iii. International conventions relating to worker rights (ILO core conventions).

   iv. International treaties and conventions relating to forestry, forest trade, and tree-based products.
f) The principles of forest management based on techniques, including: inventory, planning, protection, management of forest ecosystems, identification and management of ecologically important forest areas, carbon stocks and biodiversity, as well as technical aspects of forest operations, and their potential impacts.

g) Understanding of and ability to interpret Geographic Information Systems (GIS) as it applies to forest monitoring and management.

h) Management and control of online documents, data and records, confidential data, data privacy and protection; and

i) Application of risk assessment techniques.

5.1.2.7.2 The certification body shall ensure that the audit team consists of individuals who collectively have all the required competencies for the scope of the audit.

5.1.2.8 Maintenance of the qualification as an auditor

5.1.2.8.1. PEFC forest management training

5.1.2.8.1.1 To maintain the auditor qualification, the certification body shall ensure that qualified auditors participate in a PEFC forest management refresher training recognised by the PEFC Council whenever a new version of the forest management standard(s) they are qualified to audit, or the standards with requirements for SFM certification bodies, is published.

5.1.2.8 Maintenance of the qualification as an auditor

5.1.2.8.1 PEFC forest management training

5.1.2.8.1.1 To maintain the auditor qualification, the certification body shall ensure that qualified auditors participate in a PEFC forest management refresher training that includes a TOF module recognised by the PEFC Council whenever a new version of the forest management standard(s) and/or TOF requirements they are qualified to audit, or the standards with requirements for TOF certification bodies, is published.
### 5.1.2.8.1.2 The certification body shall ensure that such refresher training is successfully completed before conducting audits against the revised standard.

### 5.1.2.8.1.2 The certification body shall ensure that such refresher training is successfully completed before conducting audits against the revised standard.

**Note:** National or regional forest certification systems may have separate training for SFM auditors and for TOF auditors.

### 5.1.2.8.2 Audit experience

#### 5.1.2.8.2.1 To maintain the auditor qualification, the certification body shall ensure that the auditor has performed a minimum of 40 hours of forest management or equivalent audits (e.g. trees outside the forest, ISO 9001, 14001 or 45001 auditing experience in the forestry or related sector, biodiversity, natural resources management) per year.

#### 5.1.2.8.2.1 To maintain the auditor qualification, the certification body shall ensure that the auditor has performed a minimum of 40 hours of audits of disciplines directly connected to the complementary land use covered by TOF certification management or equivalent audits (e.g., forest management, ISO 9001, 14001 or 45001 auditing experience in the forestry or TOF related sector, forestry, biodiversity, natural resources management) per year.

#### 5.1.2.8.2.2 In exceptional circumstances, such as statutory leave, long-term illness, or lack of opportunities to provide certification services, auditors unable to comply with 5.1.2.8.2.1 shall perform 20 hours of forest management audits under the supervision of a qualified auditor within two years, or undergo a formal evaluation of competencies by the certification body prior to the auditor taking back auditing activities.

#### 5.1.2.8.2.2 In exceptional circumstances, such as statutory leave, long-term illness, or lack of opportunities to provide certification services, auditors unable to comply with 5.1.2.8.2.1 shall perform 20 hours of forest management audits and/or audits against disciplines directly connected to the complementary land use covered by TOF certification under the supervision of a qualified auditor within two years, or undergo a formal evaluation of competencies by the certification body prior to the auditor taking back auditing activities.

### 5.1.4 Reviewer and certification decision maker

#### 5.1.4.2 Education

#### 5.1.4.2 Education

**Note:** Tertiary education, also referred to as third stage, third level, and post-secondary education, is the educational level following the completion of a school providing a secondary education. Tertiary education can be obtained, among others, at universities, technical schools, or colleges.

**Note:** Tertiary education, also referred to as third stage, third level, and post-secondary education, is the educational level following the completion of a school providing a secondary education. Tertiary education can be obtained, among others, at universities, technical schools, or colleges.
| 5.1.4.2.2 | The certification body shall ensure that reviewers and certification decision makers have taken formal courses in forestry. |
|---------------------------------------------|
| 5.1.4.2.3 | The specific education relating to forestry (requirement 5.1.4.2.2) can be substituted by working experience in this sector if the certification body can demonstrate it is equivalent to the required education. |
| 5.1.4.4 | PEFC forest management training |
| 5.1.4.4.1 | The certification body shall ensure that new reviewers and certification decision makers have received initial training recognised by the PEFC Council on the PEFC endorsed certification system or systems for the country/countries where they conduct their certification activities. |
| 5.1.4.4.2 | The certification body shall ensure that new reviewers and certification decision makers have successfully completed the training before they start their certification activities. |
| Note: | The PEFC website provides further information on training options. |
| 5.1.4.7 | Competencies |
| 5.1.4.7.1 | The certification body shall ensure that the reviewer or certification decision maker demonstrates the ability to apply knowledge and skills in the following areas: a) Principles, objectives, requirements, criteria, and indicators of the PEFC forest management standard Benchmarks, PEFC ST 1003, Sustainable Forest Management - Requirements and PEFC ST 1002, Group Forest Management - Requirements as implemented by the PEFC endorsed certification system, as applicable. |
| 5.1.4.7.1 | The certification body shall ensure that the reviewer or certification decision maker demonstrates the ability to apply knowledge and skills in the following areas: a) Principles, objectives, requirements, criteria, and indicators of the PEFC forest management standard Benchmarks, PEFC ST 1003, Sustainable Forest Management - Requirements and PEFC ST 1002, Group Forest Management - Requirements as implemented by the PEFC endorsed certification system, as applicable. |

Note: The PEFC website provides further information on training options. Note 1: The PEFC website provides further information on training options. Note 2: PEFC endorsed certification systems may have separate training for SFM auditors and for TOF auditors.

5.1.4.7.2 The **certification body** shall ensure that the team of **reviewers** and **certification decision makers** consists of individuals who collectively have all the required competencies for the scope of the audit.

5.1.4.8 Maintenance of the qualification as a reviewer or certification decision maker

5.1.4.8.1.1 **PEFC forest management training**

5.1.4.8.1.1 To maintain the reviewer or certification decision maker qualification, the **certification body** shall ensure that the qualified **reviewer** or **certification decision maker** participates in a PEFC forest management refresher training recognised by the PEFC Council whenever a new version of the PEFC forest management standard(s) they are qualified to conduct their corresponding certification activities against, or the standards with requirements for SFM certification bodies, is published.

5.1.4.8 Maintenance of the qualification as a reviewer or certification decision maker

5.1.4.8.1 **PEFC forest management training**

5.1.4.8.1.1 To maintain the reviewer or certification decision maker qualification, the **certification body** shall ensure that the qualified **reviewer** or **certification decision maker** participates in a PEFC forest management refresher training **that includes a TOF module** recognised by the PEFC Council whenever a new version of the PEFC forest management standard(s) **and/or TOF requirements** they are qualified to conduct their corresponding certification activities against, or the standards with requirements for SFM certification bodies, is published.
5.1.4.8.1.2 The certification body shall ensure that such refresher training is successfully completed before the reviewer or certification decision maker conducts their certification activities against the revised standard.

5.1.4.8.2 Audit experience

To maintain the reviewer or certification decision maker qualification, the certification body shall ensure that the qualified reviewer or certification decision maker has participated as an observer in forest management or equivalent audits (e.g. trees outside the forest, ISO 9001, 14001 or 45001 auditing experience in the forestry or related sector, biodiversity, natural resources management) covering at least 16 hours every two years, which includes part office assessment and part field assessment and a closing meeting.

Note: The observation may take place remotely using ICT.
Appendix 6 (informative): List of forest management related legislation applicable to client organisations

Applicable local, national, or international legislation on forest management includes legislation, legal obligations, requirements, regulations, codes and nationally ratified international treaties, conventions and agreements codes covering and/or regulating

- land tenure rights, including customary rights as well as management rights, obtained according to the legally prescribed procedure
- anti-corruption legislation, including bribery & fraud
- the issuing of rights and licences according to the legally prescribed procedure, specifying legally-gazetted boundaries
- legal business registration, obtained according to the legally prescribed procedure
- concession licenses and ensuring that licences only cover legally gazetted areas, obtained according to the legally prescribed procedure
- management planning, including conducting forest inventories, having a forest management plan and related planning and monitoring, including approval by respective authorities.
- harvesting permits and/or licenses, or other legal documents required for specific harvesting operations, obtained according to the legally prescribed procedure prior to the implementation of forest harvesting activities
- forest harvesting specific fees such as royalties, payment of stumpage fees and other volume-based fees, as well as land area taxes or fees, based on correct classification of quantities, qualities and species.
- VAT and other taxes (including income and profit tax) that apply to the material being sold, including selling material as growing forest (standing stock sales).
- harvesting techniques and technology including the timing of harvest, selective cutting, shelter wood regeneration, clear felling, transport of timber from felling participants and seasonal limitations
- protected areas and protected, rare or endangered species and their habitats and potential habitats, including identification of protected areas
- environmental impact assessment in connection with harvesting, acceptable levels of damage and disturbance of soil resources, the establishment of buffer zones (e.g., along watercourses, open areas, breeding participants), maintenance of retained trees on felling participants, seasonal limitations on harvesting, and environmental requirements for forest machinery
- personal protection equipment for persons involved in harvesting activities, use of safe felling and transport practice, establishment of protection zones around harvesting participants, and safety requirements to machinery used, and safety requirements in relation to chemical usage
- employment of personnel involved in harvesting activities, including contracts and working permits, obligatory insurances, certificates of competence and other training requirements, and payment of social and income taxes
- minimum working age and minimum age for personnel involved in hazardous work, legislation against forced and compulsory labour and discrimination and legislation allowing for freedom of association
- customary rights relevant to forest harvesting activities, including sharing of benefits
● “free prior and informed consent” in connection with transfer of forest management rights and customary rights to the organisation in charge of the harvesting operation
● rights of Indigenous people as far as it’s related to forestry activities
● classification of harvested material is in terms of species, quantities, and qualities in connection with trade and transport
● trading permits and transport documents that accompany the transport of wood from forest operations
● offshore trading and transfer pricing
● CITES permits
● export/import licenses, and product classification related to customs (codes, quantities, qualities, and species)
● due diligence/due care procedures
● Disposal of Hazardous waste; use of forest chemicals (herbicides/pesticides); training/licensing for chemical applicators; and water quality
